12. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Bond Amount: \$4,526,300

Permit fee: Up to date

Purpose of Inspection:

Routine annual inspection.

Directions to Site:

The site is approximately 5 miles north of Leamington, Utah on highway 132. One can see the plant from the road.

Inspection Summary:

The highwalls appeared stable. No sign of failures were present. Josh Nelson stated that no failures had occurred in the pit.

The site is a total containment site. No sign that water had left the site. The impounding structures are working according to plan.

The Permittee should make every effort to salvage topsoil if the expansion is approved. Topsoil is important in the area because there is a limited amount of topsoil naturally in the area.

The Permittee is in the process of expanding the pit towards the south. The inspection party visited the area and looked at the exploration work.

Conclusions and Recommendations:

The Division should continue to monitor the site.
